

## “Back To High School”

C F Am Em Am

You used to say

The whole wide world was at my feet

When you looked at me

I thought this life could be lived for free

The times have changed

We're getting older every day

It's not the same

When I look at your face I want to say

### **Chorus:**

Am F C F x 2

I want to go back to high school

when we felt like we were winning

I want to be free in love again

Like I was in the beginning

The longing in my heart

It's getting stronger every day

But every day, those days just

get farther and farther away

I want to go home

But home is so far away from here

A hundred miles

And almost a decade or so of years

### **Chorus**

#### **Bridge:**

Am F C G

Back to high school

Back to high school

I want to go inside

And have it feel like I did before  
I want to hide  
Inside the house that had my front door

My problems weren't so hard  
And I was not alone with them  
I want to have you there  
So you could help me through again

**Chorus**

I want to be 17 again  
Go back to the beginning  
I want to be free in love again  
Like I was in the beginning
