

"Superstar"

By Ava Burnham

Nowadays you're living life on your own  
The only friend you have seems to be your iphone  
Everyday's hard but you gotta make it through  
wonder if you should leave try for something new

**Pre-chorus:**

Well don't run, you won't get far  
and you're never gonna be a superstar so

**Chorus:**

Let's go downtown to your favorite cafe  
and let your problems for a second fade away  
Take my hand and I won't let you fall  
Don't let the fears around you bother you at all

People are always sure  
what's right and what's cool  
But there's just one thing  
That you've figured out in school  
Whatever's in style now  
It won't last long  
The people who made their name  
They knew it all along

**Pre-chorus**

**Chorus**

Everyone's telling you  
What you should do  
Well don't bother listening  
Unless you want to

**Pre-chorus**

**Chorus**

**Pre-chorus**

**Chorus**
